

ARCTIC VISION RW01

STUDDABLE WINTER TIRE

The Rovelo Arctic Vision RW01 is a dependable studdable winter tire built for snow, ice, and extreme cold. With 3PMS (Three-Peak Mountain Snowflake) and IGS (Ice Grip Symbol) certifications, its flexible rubber and directional tread deliver confident grip and handling, clearing slush and snow with ease. From fresh powder to icy roads, it's ready for every winter drive.

ANGLED TREAD BLOCKS - 3PMS CERTIFIED

Tread blocks are strategically angled to bite into snow and ice, enhancing traction and braking performance.

WINTER GRIP - IGS CERTIFIED

RW01 incorporates high-density, multi-angle sipes that increase grip on ice and compact snow.

IMPROVED HYDROPLANING RESISTANCE

V-shaped grooves quickly evacuate water and slush, maintaining consistent contact with the road surface.

Le Rovelo Arctic Vision RW01 est un pneu d'hiver fiable, cloutable, conçu pour la neige, la glace et les grands froids. Certifié 3PMS (montagne à trois pics avec flocon) et IGS (symbole de traction sur glace), il offre une bonne maniabilité grâce à son caoutchouc souple et sa bande de roulement directionnelle, qui évacue facilement la neige et la gadoue. De la poudreuse aux routes glacées, il est prêt pour l'hiver.

PAVÉS DE GOMME EN ANGLE - CERTIFIÉ 3PMS

Les pavés de gomme sont stratégiquement inclinés pour mieux adhérer à la neige et à la glace, améliorant ainsi la traction et les performances de freinage.

ADHÉRENCE HIVERNALE - CERTIFIÉ IGS

Le pneu RW01 est doté de lamelles à angles multiples et à haute densité qui améliorent l'adhérence sur la glace et la neige compacte.

RÉSISTANCE À L'AQUAPLANAGE AMÉLIORÉE

Les rainures en V évacuent rapidement l'eau et la neige fondante, assurant un contact uniforme avec la surface de la route.
